Role:	EHS Manager	Role:	Plant Manager
Ref No.	HSE- POL022	Version: 3	Date: 13/11/2018

1. Introduction

FMC Agro Limited supplies crop protection, foliar nutrition, soluble fertilisers and adjuvants to UK and international markets.

2. Statement

The business is committed to:

- Environmental protection and pollution prevention
- Compliance with legal, FMC and other requirements
- Sustainable development and the continuous improvement of environmental performance.

3. Aims

The business aims to attain ISO 14001 accreditation, starting with ensuring that the environmental management system is ISO compliant.

The business plans to eliminate onsite generation of electricity from fossil fuels by installing a transformer capable of satisfying all the site's power needs from the grid.

The use of fossil fuels, on site, is planned to be reduced by the introduction of electrically powered FLT's and the extension of the use of electrically powered PPT's.

Reducing the frequency of onsite loss of containment events is being targeted with multiple actions:

- Working with the laundering contractor to improve the performance of IBC base valves.
- The use of alternative intermediate storage without base valves is being trailed
- The installation of fixed filling line header tanks to eliminate the use of IBCs in that role has begun.
- Highlighting loss of containment events, learning and sharing lessons with employees

The business aims to maintain and extend systems and practices which control the environmental impact of the operation by:

- Maintaining procedures to control significant environmental aspects and impacts
- Maintaining zero to landfill waste management practices
- Managing waste to eliminate fugitive emissions
- Engaging employees and providing them with the information and resources to maintain environmental performance
- Ensuring contractors are aware of their environmental responsibilities

4. Responsibilities

The Plant Manager has overall responsibility for the site's environmental policy and performance. The Plant Manager ensures that the local policy and objectives align with those of FMC Corporation. The Plant Manager is supported, in the delivery of environmental performance, by the Site Leadership Team which includes the EHS Manager.

4. Review

The policy is reviewed annually or in response to significant change.
