

FMC**Classic™****A high load formulation delivering manganese****CONTAINS**

Manganese (Mn): 500 g/l

FORMULATION

Classic is a ready-to-use liquid containing manganese, formulated as a suspension concentrate, for correction of manganese deficiency in a wide range of crops. It contains an advanced surfactant/suspension system to ensure rapid and even dispersion in the spray tank and superior adhesive properties on foliage.

DEFICIENCY

Most crops are sensitive to manganese levels, particularly cereals, vegetables, brassicas, root crops and fruit. Both high and low pH soils will suffer from manganese deficiency as well as chalky soils and recently ploughed-up grassland. Puffy soils may suffer from deficiency, as may those which are heavily leached or poorly drained. Stresses caused by adverse growing conditions aggravate the situation.

RATES OF USE

Apply Classic at 1 l/ha. Repeat applications at 10 - 14 day intervals if required. Do not apply to protected crops. Use at least 200 litres of water per hectare. Increase the water volume as necessary for application to bush, cane or top fruit.

TIMING

Cereals: Apply from the 3 leaf stage.

Oilseed rape, leaf and root brassicas, sugar beet: Apply from the 4 - 6 leaf stage.

Peas and beans: Apply from 4 - 6 fully expanded leaf stage with repeat treatments as required.

Potatoes: Apply from full emergence.

Grass: Apply when growth re-commences in the Spring.

Other crops: Apply when there is sufficient foliage present to retain the spray.

It is recommended that soil and tissue analysis results are used whenever possible to guide micro and macronutrient applications to optimise crop nutrient status.

Do not apply this product in very bright sunlight or in temperatures above 25°C. If possible, spray in the evening or early morning for best results.

APPLICATION

Shake the container well before opening and use.

Spray equipment should be clean.

Half fill the spray tank with water, begin agitation and add the required quantity of Classic. Rinse the container thoroughly, add the rinsings to the spray-tank, complete the filling and apply without delay. Maintain agitation throughout.

Clean sprayer thoroughly after use.

COMPATIBILITY

Classic is physically and chemically compatible with a wide range of agrochemical products. Consult your supplier for the latest information. Up-to-date information is available at www.fmc-agro.co.uk. Always read the label of the partner product carefully before mixing with Classic.

STORAGE

Protect from frost. Store above 5°C.

Keep in cool, well ventilated suitable store. Do not store in direct sunlight or near direct sources of heat. Keep out of reach of children. Keep away from food, drink and animal feedstuffs.

SAFETY PRECAUTIONS

The product is not classified as hazardous under CLP (REG EC 1272/2008).

Contains 1,2-Benzisothiazolin-3-one. May produce an allergic reaction.
